DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of Group I in the reply filed on 5/22/2008 is acknowledged. The traversal was not found to be persuasive because there cannot be a special technical feature when the common technical feature is found in the prior art as explained in the restriction requirement of 4/22/2008. See also MPEP 1850.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Bruno '239.

In regard to claims 1-2, Bruno teaches a titanium dioxide powder having a rutile content of 95-100% and a surface area of from 30-90 m²/g. See column 4, lines 56-64.

In regard to claims 3-5, the limitations in these claims are product-by-process limitations. The product of Bruno appears to be the same as that of the instant invention because it has the same properties as that of the instant invention (see the rejection of claims 1-2 above), and when the product of a product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior art product was made by a different process. See MPEP 2113.
